Canada.

Dear EOCRO's benefactors.

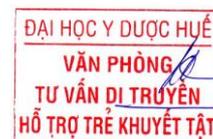

Le Thi Huong's, heart patient, operation fee was 50,000,000 vnd. The Health Care Insurance and her family paid 40,000,000 vnd. **We received 10,000,000 vnd from EOCRO to support to Le Thi Huong.**

Le Thi Huong, a 49-year-old woman, lives with her family in Hoa Son commune, Thanh Phuoc district, Quang Ngai province. Huong has a husband and 4 children. Two older children have married and live separately and the last 2 children still live with her family. However, only the last child is allowed to go to school because Huong could not pay the school fee for 2 children. Huong and her husband are both farming with low and unstable income. Sometimes, they earn not enough to eat so the family faces many difficulties. The whole family is living in a small and degraded house left by Huong's parents-in-law. There is also no valuable property in their house. Therefore, Huong's family belongs to the poor household of the commune.

Huong has found her heart disease for more than 15 years. Because of poverty, Huong could not afford to be treated. Therefore, her illness was getting worse and worse. So far her illness has become severe and can not delay treatment anymore. Her children took her to the hospital for examination and were immediately assigned to surgery for a cost of 50 million VND.

On behalf of Le Thi Huong and her family, permit us to say thank you so much to donors of Eyes of Compassion Organization for Le Thi Huong so that she can come back to a normal life.
