

EOCRO contributes to the FUTURE SCHOOL VN\$ 10,000,000 (USD 430.00) each month, to provide vegetarian meals to the students at school and the tuition fees for the five students from poor families.

OGCDG office has a school specializing in the education of children with intellectual disabilities.

The school has right now 35 students who suffer from Down Syndrome, cerebral palsy, autism, .... Normally the parents have to contribute a small part to the tuition fee depending on the financial situation of the family but if they don't receive any aid from us, they won't be able to send their children to school.

The activities of the school rely solely on the tuition fees since there is no other means to remunerate the teachers who work extremely hard all day long while receiving a poor salary.

There are 5 children whose families are unable to contribute to the tuition fees. EOCRO sponsors them, giving them a monthly VN\$ 200,000 per student to help them continue their study.

At Tuong Lai School the studies are from morning to afternoon and lunch is provided by the school.

Every day the kitchen of the school cooks lunch for the children.

There are 53 students and 10 teachers, altogether 63 persons.

Each vegetarian meal costs VN\$ 6,000 x 63 persons = VN\$ 378,000/day x 22 days of school per month = VN\$ 8,316,000/month
